

ClearCut

IT TRAINING

Power BI Intermediate

This course is all about improving data analysis skills. More time is spent on data relationships, and data modelling.

The DAX language is introduced in greater detail, as is problem-solving in Power BI using both visualisations and DAX.

Key Topics

- Applying conditional formatting
- Creating Computed Columns
- Creating Measures
- Grouping data
- Creating Conditional Columns
- Using relationships to analyse data
- Pivoting data
- Creating data tables from existing information
- Import data from a database server
- Working with DAX Formulas
- Creating multipage reports
- Exporting data to CSV, Excel and PowerPoint
- Creating a Power BI App
