

Duration: 1 day

An introduction to Articulate Storyline 360. Delegates will learn how to create self paces, interactive and engaging training applications for mobile, and the web.

Delegates on this course will learn about targeting learning to the audience and how to take advantage of Storyline's facilities.

Topics

- An Introduction to Articulate Storyline 360.
- Learning about the interface. In particular, scenes, slide view, panels, and the story view.
- How to build a slide: this incorporates graphics, text and animation.
- How to use the timeline feature to establish the visibility of an object in the presentation.
- Customise the player interface by learning about topic menus, custom tabs, search controls, volume and text labels.
- Using illustrated or photographic characters to increase engagement.
- Creating animations using motion paths.
- Adding buttons to your presentation.
- How to import and export audio including instructional dialogue.
- How to create an accessible presentation.
- Learning to record the screen for software and other training.
- Creating quizzes and banks of questions.
- Publishing for web, mobile, or an LMS.
